## IASGO & its Egyptian Chapter

IASGO was founded in Amsterdam in 1988. Today, it has strong sections in more than 70 countries, which greatly assists in assessing educational needs. The main goal of this organization has been and remains globalization of medical knowledge and expertise through a well-structured and precisely organized system of continued medical education.

In pursuit of this goal the Egyptian Chapter of IASGO was inaugurated in May 2017 to emphasize the Egyptian identity in the surgical field and catch up with international standards.

## What is different this year?

This year we are not only introducing up-to-date researches and cases in the field of gastroenterology, but we have integrated artificial intelligence under the theme of Harmony of Humanity and Technology-Application of AI in GI Diseases.

As physicians handle large amounts of clinical data and various kinds of image devices such as endoscopy and ultrasound, AI has been applied in gastroenterology in terms of diagnosis, prognosis, and image analysis. Join us to learn more...
